

Join Us at Aumne.ai

Aumne.ai is a next-generation AI company focused on solving complex challenges in customer experience and AI transformation. We work with businesses to help them reimagine how they connect with customers—using the power of artificial intelligence to drive smarter interactions, streamlined processes, and scalable support.

Our mission is to build intelligent systems that are deeply intuitive, flexible, and easy to integrate—empowering companies to modernize their operations and deliver exceptional value to their customers.

If you're passionate about shaping the future of AI and solving high-impact real-world problems, we'd love to have you on our team.

Job Title: Fresher/ Interns– Python & AI

Experience: Fresher

Location: Bangalore / Remote

Department: Engineering

Employment Type: Full-Time

Role Summary:

As an AI Intern, you will work on real-world projects that leverage state-of-the-art technologies and methodologies. You will have the chance to contribute significantly to our mission by:

- **Data Processing for Retrieval-Augmented Generation (RAG):** Cleaning, analysing, and processing large datasets to enhance the performance of LLM-based applications.
- **Context Retrieval Methodologies:** Developing and implementing advanced techniques for efficient context extraction and integration.
- **Platform & Application Development:** Engaging in the design, development, and deployment of AI-powered applications using modern programming paradigms and LLMs.

At our startup, independence and pro-activity are essential. We expect you to take initiative, drive your projects forward, and work autonomously in a fast-paced, innovative setting.

Key Responsibilities:

- **Develop & Experiment:** Work on algorithms and models in the applied AI domain, experimenting with various data processing techniques and LLM implementations.
 - **Optimize:** Analyze performance, debug issues, and continuously refine processes to ensure the highest quality of AI solutions.
 - **Learn & Grow:** Participate in regular training sessions and mentorship programs to advance your technical skills and industry knowledge.
-

Required Skills & Qualifications:

- **Programming Proficiency:** Strong skills in both object-oriented and functional programming paradigms.
 - **Python Expertise:** Solid understanding of Python and its applications in AI and data processing.
 - **Analytical Skills:** Excellent problem-solving, debugging, and analytical abilities.
 - **AI Awareness:** Basic understanding of Large Language Models (LLMs) and their applications is a plus.
 - **Independence & Pro-activity:** Demonstrated ability to work independently and proactively in a startup environment.
 - **Curiosity & Innovation:** A keen interest in applying theoretical knowledge to practical business challenges.
-

What We Offer

- **Technical Stack Exposure:** Work with cutting-edge tools and frameworks in the Applied AI domain, including:
 - Advanced data processing techniques for RAG.
 - Modern context retrieval methodologies.

- Platform and application development with LLMs.
 - **Real-World Experience:** Engage in projects that address real business challenges, enhancing your technical skills and industry insights.
 - **Dynamic Learning Environment:** Benefit from continuous mentorship, training sessions, and collaborative projects.
 - **Flexible Internship Models:** Paid or unpaid internships based on qualifications, with a clear pathway to full-time employment.
-
